DETAILED ACTION

1. The provisional double patenting rejection has been overcome, however upon further review of the claims, necessitates a Restriction, any inconvenience to the applicant is regretted.

Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-14, are drawn to controlling a memory in a digital system, classified in class 345, subclass 530.
- II. Claim 15, is drawn to a digital TV receiver, classified in class 348, subclass 714.

3. Inventions of Group 1 and Group II are related as combination and subcombination disclosed as useable together in a single combination. Inventions in this relationship are distinct if it can be shown that the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and that the subcombination has utility by itself or in other combinations. The combination (Group 1) discloses a digital system which controls the compression/decompression of memory blocks within a memory. The combination (Group II) discloses a digital TV receiver with includes a tuner, TP analyzer, decoder, A/V decoder and a microcomputer which includes a storage managing module, request processing module, synchronism control module, memory, OSD processor and a display, where the digital TV receiver

additionally recites a memory managing module. In the instant case, the combination (Group II) as claimed does not require the particulars of the subcombination (Group I) as claimed because the claims to both the combination and subcombination are presented and assumed to be patentable. The omission of details of the claimed subcombination (Group I) in the combination claim (Group II) is evidence that the patentability of the combination does not rely on the details of the specific combination. The subcombination (Group I) has separate utility since the subcombination may be used for computer displays, image processing and data which may/may not be related to TV data. See (MPEP 806.05(c)).

4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.43).

6. Applicant is reminded that upon cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
